PROFILE INFO

Passionate about learning and exploring various technical domains, I am a web development enthusiast with hands-on experience in both front-end and back-end technologies. I aim to delve deep into web technologies and apply them to real-world problems, integrating various technical skills to deliver effective solutions.

Projects

Social Media Website :
- Created a platform with features like posting, deleting, updating profiles, uploading reels, and real-time likes/comments using AJAX.
- Built with Django, HTML, and CSS for a responsive and interactive user experience.

Task Manager Website :
- Built with Django, JavaScript, and Celery for task categorization, reminders, and real-time updates.
- Features task visualization using Plotly and a great UI for a smooth experience.

College Travel Concession Website :
- Developed a site for students to apply for travel concessions, with an admin panel for form validation and email receipt dispatch.
- Built using HTML, CSS, JavaScript, and Django.
